Dear Hiring Manager,

This email is in regard to my interest in applying for the Software Engineer Intern position recently posted on the Indeed website. With my skill set and competencies I am more than able to design and monitor high efficient programs in order to meet with the requirements a company like Okta should have.

While pursuing a Computer Programmer Analyst program at George Brown College, I have developed skills in server-client interaction and a deep focus on web development, using languages like HTML, JavaScript and PHP mainly. This knowledge has enabled me to create dynamic and static programs that satisfy the user's needs. In addition, big part of my program was focused on how to effectively implement agile methodologies in projects in order to improve goals requirements and to deliver and efficient system.

With the experience I have accumulated over the years in my program in areas such teamwork and problem solving, I feel more than prepared to assume this position at Okta. In multiple occasions when I had to prepare a project with my classmates we met the expectations every single time. With time management, problem solving and organization skills we were able to always deliver a project that surpassed expectations.

I'm currently in a 3 year program at George Brown College, where I have been able to further strengthen my technical skills. I have attached my resume highlighting my academic and professional accomplishments. I look forward to hearing from you in due course. Please feel free to contact me at my personal email or phone number.

Sincerely,

Sergio Lombana
