  George Brown College   09/2018 – 04/2020
  Toronto
    - Guided students on how to properly edit their resume and how to prep for interviews
    - Led team of peer coaches through college activities like workshops and seminars

PROJECTS

- **.NET Customer Satisfaction System**

  - ASP.net application in charge of coordinating customer reviews and overall satisfaction for company's products. The app counts with an admin side to let the user create tickets for unresolved reviews.

- **PHP Inventory Management System**

  - PHP and Laravel framework application built in order to provide PrimeXchange an interface to control and view Inventory. The app counts with authentication in order to perform CRUS operations on the Inventory by either UI elements or importing Excel sheets

  ---

- **MEAN Warehouse Management System**

  - MEAN stack application built for Shiva Exports Ltda to manage their warehouse space and keep track of orders. The app connects to API's to provide a live location of shipment truck. The app uses MySQL for data persistence.
