SUMMARY

Computer Programming undergrad seeking an industry opportunity where I can put into practice my knowledge acquired in my studies. Strong personal and professional skills. Looking for a company where I can improve and learn while demonstrating my expertise.

PROJECTS

Employee Management System

– Built using PHP, Laravel Framework, JavaScript and SQL database. Is A website that lets employers manage employees schedule, to-do list and track work time. I also used Google API's in order to build the system

ASP.NET Incident Report Management Software

– Built as part of an assignment in my program. It is a .net application that creates a platform where Users can submit surveys and incident reports about service and technical assistance of a company. Achieved on a deadline

Laravel CRUD Web-application

– Allows user to operate simple CRUD functions and modify a database through a user interface

EDUCATION

Computer Programming Analyst

George Brown College

~ 01/2018 - 2020

RELEVANT COURSES

- Advanced Object Oriented Programming
- Advanced Web Development
- Advanced Database Development
- Data Structures

GPA

3.8/4.0

EXPERIENCE

Computer Programming Tutor

George Brown College

09/2019 - Ongoing   – Toronto

- Helped student with Web Development queries
- Created challenges for students once a week

Student Advisor (Peer-coach)

George Brown College

09/2018 - Ongoing   – Toronto

- Tutored web programming students
- Delivered workshops on soft skills
- Advised students on Resumes

Waiter

Fukui Sushi

06/2019 - 09/2019 + Toronto

- Took customers orders
- Cleaned restaurant after closing
